 - Relational Databasing
 - Fault-tolerant Design
 - Unit Testing
 - Versioning
 - *NIX

What

Designer

Programmer

Engineer

Architect

I'm eager to learn, great at problem solving, skilled at object orientation, and creative.

How Long

15 Years Personal

2 Years Professional

Where

Celerity LLC
2010 to current

At Celerity I did contract web programming for Capital One. I worked on their primary website:

<http://capitalone.com>, <http://capitalone.ca>.

Responsibilities

- Computer Programmer
- Software Developer
- Systems Analyst
- Professional Engineer
- Consultant
- Technical Writer

Most of my time was spent working on the Canada website. I spent a great deal of time knee-deep in code and refactoring outdated or obsolete code.

Working there was a very fast paced environment; our release cycle was 1-2 months, while working on multiple projects at one time.
